

# Index to ASME TRANSACTIONS

Volume 80, 1958

The ASME Transactions for 1958 was issued in January, February, April, May, July, August, October, and November, 1958. The Society Records for the year 1958 appeared as supplements in February, 1958, and the index section in January, 1958. The page numbers for these supplements are designated by the symbol SR, and the supplement contains its own index.

## A

ABSORPTIVITY. <i>See</i> HEAT TRANSFER	
ACCELERATION. <i>See</i> KINEMATICS	
ADHESION (RAIL)	
Advancing adhesion—development and test of a chemical formulation to condition the running surface of rail for improved wheel-to-rail adhesion.....	1037
ADOLPH, E. F.	
Biotechnical problem of the human body as a heat exchanger (D).....	346
AEBERLI, A. E.	
"DeCew Falls, Abitibi" turbine tests....	1517
AERODYNAMICS. <i>See</i> AIRFOILS	
AGOSTINELLI, A.	
Prediction of flashing water flow through fine annular clearances.....	1138
AINSWORTH, FRANK W.	
Effects of conduit dynamics on control-valve stability (D).....	908
AIR HEATERS	
In-service washing of Ljungstrom air preheaters on pulverized coal-fired steam generators.....	217
Optimization of plate-type air preheaters for automotive gas turbines.....	1791
AIR LUBRICATION. <i>See</i> BEARINGS	
AIR PREHEATERS. <i>See</i> AIR HEATERS	
AIRFOILS	
Stall propagation in a cascade of airfoils.....	777
AIRPLANE ENGINES. <i>See also</i> GAS TURBINES	
Ideal performance of valved-combustors and applicability to several engine types.....	1027
Simple method of estimating the Reynolds number effects on aircraft gas-turbine engines operating at high altitude.....	1264
AIRPLANE WINGS	
Some methods for the structural design of wings for application either at ambient or elevated temperatures....	419
AIRPLANES	
Transient temperature and thermal stresses in skin of hypersonic vehicle with variable boundary conditions....	1389
AKLEY, L. T.	
Gyro-integrating mass flowmeter.....	1849
ALLEN, R. K.	
Advancing adhesion—development and test of a chemical formulation to condition the running surface of rail for improved wheel-to-rail adhesion.....	1037
ALTITUDE EFFECTS. <i>See</i> AIRPLANE ENGINES	
ALUMINUM	
Aluminum in rolling stock; impact tests at collision speeds.....	1609
AMERICAN SOCIETY OF MECHANICAL ENGINEERS	
Transactions to be split into three quarters.....	1182
ANANTANARAYANAN, R.	
Effect of vibration on heat transfer from a wire to air in parallel flow.....	1426
ANDERSON, DONALD R.	
Sulfuric acid corrosion in oil-fired boilers—studies on sulfur trioxide formation.....	1231
APPEL, F. C.	
On the theoretical analysis of a dynamic thermocouple.....	307
APPLEBATH, S. B.	
Treatment of make-up feedwater, condensate, and recycle water for supercritical and nuclear-reactor power-plant cycles (D).....	1672
ARPAI, V. S.	
Dynamic response of heat exchangers having internal heat sources.....	612, 625

Issue	Page Numbers
January	1- 256
February	257- 510
April	511- 766
May	767- 974
July	975-1182
August	1183-1342
October	1343-1598
November	1599-1854

ANDRY, GEORGE C., JR.	
Recovery ratio—a measure of the loss recovery potential of compressor stages (D).....	523
AUSMAN, J. S.	
Effect of heat conductance on slider-bearing characteristics (D).....	804
Theoretical and experimental analysis of hydrodynamic gas-lubricated journal bearings (D).....	875
AUTOMATIC CONTROL. <i>See also</i> FREQUENCY RESPONSE, HYDRAULIC SYSTEMS, SERVOMECHANISMS	
Algebraic approach to design of automatic controls.....	433
Analysis of the transient response of nonlinear control systems.....	427
Continuous measurement of characteristics of systems with random inputs: a step toward self-optimizing control	
Correlation functions and noise patterns in control analysis.....	1839
Design of a self-optimizing control system	
Interpreting dynamic measurements of physical systems.....	479
On-off control with periodic sensing device.....	468
Optimal synthesis of linear sampling control systems using generalized performance indexes.....	833
Optimization of time-varying linear systems with nonstationary inputs.....	1459
Statistical treatment of sampled-data control systems for actual random inputs.....	457
Subharmonic oscillations of nonlinear feedback control systems.....	444
Survey of mathematical methods for nonlinear control systems.....	1802
Time domain synthesis of sampled-data control systems.....	1439
Time domain synthesis of sampled-data control systems.....	1827

## B

BACKER, W. R.	
On the basic mechanics of the grinding process.....	141
BACON, HILARY E.	
Treatment of make-up feedwater, condensate, and recycle water for supercritical and nuclear-reactor power-plant cycles (D).....	1673
BAKER, H. D.	
Model method for determining geometric factors in solid-to-solid radiation heat transfer.....	367
BAKER, OVID	
Concurrent flow of air, gas-oil, and water in a horizontal pipe (D).....	255
Two-phase flow in rough tubes (D).....	285
BARKAN, P.	
Dynamic characteristics of cam forms calculated by the digital computer (D).....	1701
BARWELL, F. T.	
Advancing adhesion—development and test of a chemical formulation to con-	

dition the running surface of rail for improved wheel-to-rail adhesion (D).....	1049
BASFORD, P. R.	
Properties of friction materials	
I—Experiments on variables affecting noise.....	402
II—Theory of vibration in brakes.....	407
BASSETT, W. V.	
Overstrain and bursting strength of thick-walled cylinders (D).....	568
BATCHELDER, L. A.	
Gyro-integrating mass flowmeter.....	1849
BAUDRY, R. A.	
Influence of load and thermal distortion on the design of large thrust bearings. Oil seals to provide positive lubrication on large or high-speed thrust bearings.....	807
BEAMS	
Prediction of creep in bending from tension and compression-creep data when creep coefficients are unequal.....	819
BEAN, H. S.	
Gyro-integrating mass flowmeter (D).....	1854
BEARINGS. <i>See also</i> LUBRICATION	
Behavior of the lubricating film and side leakage in dynamically loaded bearings.....	826
Effect of heat conductance on slider-bearing characteristics.....	800
Influence of load and thermal distortion on the design of large thrust bearings. Influence of pressure and temperature on oil viscosity in thrust bearings.....	807
Oil seals to provide positive lubrication on large or high-speed thrust bearings.....	1108
Oil-whip resonance.....	819
Self-excited vibrations of an air-lubricated thrust bearing.....	1490
Slipper bearings and vibration control in small gas turbines.....	411
Solution of Reynolds' equation for finite journal bearings.....	1756
Solution of the tapered-land sector thrust bearing.....	858
Static and dynamic characteristics of compensated gas bearings.....	1510
Theoretical and experimental analysis of hydrodynamic gas-lubricated journal bearings.....	1503
Theory of oil whip for vertical rotors supported by plain journal bearings.....	865
Viscosity-pressure effect on friction and temperature in a journal bearing.....	1497
BEITLER, S. R.	
Method for predicting supercompressibility factors of natural gases.....	1099
BELL, C. W., SR.	
Controlled starting and loading of modern central power stations (D).....	1358
BELL, K. J.	
Heat transfer and fluid friction during flow across banks of tubes—VI. Effect of internal leakages within segmentally baffled exchangers.....	1204
BENFORADO, D. M.	
Vibration of rods induced by water in parallel flow.....	53
BENNETT, J. R.	
Subcritical and critical flow through straight-through, elbow, and tee A-N fittings and sharp-edged orifices at elevated temperatures.....	991
BENNER, W. A.	
Effects of stage characteristics and matching on axial-flow-compressor performance (D).....	1349
BERENSON, P. J.	
On the stability of boiling heat transfer (D).....	1290
BERG, M. S.	
Experimental determination of gear tooth stresses in large marine gears (D).....	716

(D) denotes discussion of a paper.

BERGELIN, O. P. Heat transfer and fluid friction during flow across banks of tubes—VI. Effect of internal leakages within segmentally baffled exchangers.....	53	BERGREEN, D. Vibration of rods induced by water in parallel flow.....	991	CHERUBIM, J. Theoretical and experimental analysis of hydrodynamic gas-lubricated journal bearings (D).....	876
BERNATH, L. Investigation of burnout flux in rectangular channels at 2000 psia (D)....	400	BURSTING TESTS Application of the Griffith-Irwin theory of crack propagation to the bursting behavior of disks, including analytical and experimental studies.....	1643	CHESTNUT, HAROLD Algebraic approach to design of automatic controls (D).....	441
BEYANS, J. T. Comparison of total emittances with values computed from spectral measurements.....	1405	BYRNES, J. J. Vibration of rods induced by water in parallel flow.....	991	CHIEN, K. L. Dynamic analysis of a boiler.....	1809
BEYER, W. A. Quasilinear heat flow (D).....	645	<b>C</b>	CHIPS AND CHIP FORMATION. <i>See</i> GRINDING, METAL CUTTING		
BICE, G. W. In-service washing of Ljungstrom air preheaters on pulverized coal-fired steam generators (D).....	222		CHISHOLM, D. Two-phase flow in rough tubes.....	276	
BILLINGS, J. H. Resistance to rolling and sliding (D)...	919		CIMA, R. M. Transient response of a two-fluid counterflow heat exchanger—the gas-turbine regenerator.....	1169	
BIOTECHNOLOGY. <i>See</i> PHYSIOLOGY			CLARK, J. A. Boiling heat transfer to water containing a volatile additive (D).....	1402	
BIRKERBAK, RICHARD C. Measurements of the total absorptivity for solar radiation of several engineering materials.....	373		CLARK, J. S. Performance and reliability of aero-gas-turbine combustion chambers.....	1741	
BJORKLUND, J. S. Heat transfer from a rotating cylinder with and without crossflow.....	70		CLEVELAND, D. S. Gyro-integrating mass flowmeter.....	1849	
BLADER. <i>See</i> COMPRESSORS, STEAM TURBINES			CLOMITE, F. A. Influence of various grinding conditions upon residual stresses in titanium.....	297	
BLOK, H. Temperature distribution at tool-chip and tool-work interface in metal cutting (D).....	318		COCHRAN, E. P., JR. Study of corrosion and cavitation-erosion damage.....	1325	
BLOWDOWN. <i>See</i> GAS RECEIVERS			COHEN, L. Heat-transfer studies of naval boilers.....	683	
BOGLI, J. S. Investigation of effective thermal conductivities of powders in various gases.....	1417		COLDING, BERTIL N. Effect of tool-chip contact area in metal machining (D).....	1093	
BOILER CORROSION Formation of sulfuric acid in boiler flue gases.....	225		COLE, J. A. Theory of lubrication in short journal bearings with turbulent flow (D).....	1738	
BOILER FURNACES Investigation of the variation in heat absorption in a pulverized-coal-fired slag-tap steam boiler at Blaine Island, Charleston, W. Va.....	1239		COLLINS, L. J. Experimental determination of gear tooth stresses in large marine gears (D).....	201	
BOILERS. <i>See also</i> WATER Dynamic analysis of a boiler.....	1809		COLLISION. <i>See</i> RAILROAD CARS		
Heat-transfer studies of naval boilers.....	683		COLWELL, L. V. Behavior of cutting fluids in reaming steels.....	1073	
Sulfuric acid corrosion in oil-fired boilers—studies on sulfur trioxide formation.....	1231		Method for studying the behavior of cutting fluids in wear of tool materials.....	1054	
BOILING. <i>See also</i> HEAT TRANSFER Bubble growth rates in boiling.....	721		COMBUSTION Calculation of theoretical flame temperatures in furnaces.....	202	
Cavitation and nuclei.....	1315		Ideal performance of valved-combustors and applicability to several engine types.....	1027	
Investigation of burnout heat flux in rectangular channels at 2000 psia.....	391		Investigation of the variation in heat absorption in a pulverized-coal-fired slag-tap steam boiler at Blaine Island, Charleston, W. Va.....	1239	
On the stability of boiling heat transfer.....	711		Performance and reliability of aero-gas-turbine combustion chambers.....	1741
